PROFESSIONAL SUMMARY

Artificial Intelligence and Data Science graduate with hands-on experience in Python, SQL, machine learning, data analysis, predictive analytics, and data visualization. Skilled in data cleaning, transformation, exploratory data analysis (EDA), feature analysis, model development, evaluation, and actionable business insights. Experienced with Power BI, Pandas, NumPy, Matplotlib, PyTorch, YOLOv8, and Generative AI/LLM projects. Seeking an entry-level Data Scientist / AI-ML role focused on predictive analytics, automation, intelligent decision-making, and data-driven business solutions.

TECHNICAL SKILLS

Programming: Python, SQL

Machine Learning & AI: Machine Learning, Deep Learning, Predictive Analytics, Model Development, Model Evaluation, Generative AI

Data Analysis: Data Cleaning, Data Transformation, Exploratory Data Analysis, Feature Analysis, Data Processing, Statistical Analysis

Visualization: Power BI, Matplotlib, Dashboard Development, KPI Analysis

Libraries & Frameworks: Pandas, NumPy, PyTorch, OpenCV, YOLOv8, FastAPI

Generative AI: Qwen2.5, LoRA, PEFT, LLM Fine-Tuning

Database & Tools: MySQL, Microsoft Excel, Git, GitHub

EDUCATION

B.Tech – Artificial Intelligence and Data Science

Vel Tech High Tech Dr. Rangarajan Dr. Sakunthala Engineering College | CGPA: 7.98/10 | 2022–2026

HSC – Sir Ramaswamy Mudaliar Higher Secondary School | 80.5% | 2022

SSLC – St. Moses Matriculation Higher Secondary School | 90% | 2020

INTERNSHIP EXPERIENCE

AI & ML Intern | Nstore Retech Private Limited | Jun 2026 – Aug 2026

- Worked on an AI-powered commerce management system using Python, FastAPI, React.js, MySQL, REST APIs, and AI technologies.
- Contributed to AI functionality, backend integration, automated workflows, testing, debugging, and data processing.
- Integrated AI components with application workflows to support intelligent customer-facing functionality.

Python with AI & Data Science Intern | NSIC

- Analyzed datasets using Python, Pandas, NumPy, and Matplotlib to derive analytical insights.
- Performed data preprocessing, analysis, and visualization to identify trends and patterns in datasets.

PROJECTS

Customer Behaviour Analysis | Python, SQL, Excel, Power BI

- Conducted end-to-end analysis of customer and transaction data to identify purchasing patterns, customer preferences, and business trends.
- Cleaned, transformed, and analyzed structured datasets using Python, Pandas, SQL, and Excel for exploratory data analysis.
- Performed EDA and feature analysis to identify customer segments, purchasing frequency, revenue trends, and high-value customer behavior.
- Developed interactive Power BI dashboards to monitor sales performance, customer segments, purchase frequency, and revenue-related KPIs.
- Translated analytical findings into actionable business insights to support data-driven decision-making and customer-focused strategies.

Real-Time Traffic Congestion Monitoring and Prediction System | Python, OpenCV, YOLOv8

- Developed an AI-based real-time traffic monitoring system using Python, OpenCV, YOLOv8, and machine learning techniques.
- Implemented vehicle detection, vehicle counting, and congestion monitoring to analyze real-time traffic conditions.
- Developed an ambulance detection workflow to support emergency vehicle prioritization and intelligent traffic signal decision-making.
- Applied data processing and machine learning techniques to identify traffic patterns and support congestion prediction.
- Integrated computer vision and machine learning components into a real-time intelligent decision-support system.

Custom Object Detection Using YOLOv8 | Python, PyTorch, OpenCV, Labellmg

- Collected and labeled custom image data and developed a YOLOv8 object detection model using Python, PyTorch, OpenCV, and Labellmg.
- Fine-tuned and evaluated the model to detect Pen, Handkerchief, Spectacles, ID Card, and Watch from real-time webcam input.
- Performed dataset preparation, model training, validation, testing, and real-time inference.

Personal AI Assistant | Python, Qwen2.5, LoRA/PEFT

- Developed a personalized AI assistant using Python, FastAPI, React.js, and the Qwen2.5-0.5B language model.
- Fine-tuned a language model using LoRA/PEFT on a custom dataset to adapt model responses to personalized use cases.
- Implemented model inference and switching between the fine-tuned model and the original Qwen model.
- Performed dataset preparation, model training, evaluation, debugging, and inference testing.

ADDITIONAL SKILLS

Machine learning | Deep learning | Model training and evaluation |
